

# CASE STUDY

Study Site: Meridien Research  
Indication: Smoking Cessation Vaccine

Enrollment Goal: 9      Actually Enrolled: 9  
Randomized: 100%      Retention Rate: 100%

## Objective

A drug development company in Maryland needed proven sites for a trial of their nicotine conjugate vaccine, which was designed to reduce physical addiction to nicotine.

## Solution

No strangers to vaccine trials, Meridien Research completed a feasibility analysis and several of their Florida clinics became study sites.

The study had many exclusions that made recruitment difficult. Meridien Research spent time developing marketing and outreach plans to recruit smokers for this study across the Tampa Bay area. Over the course of a year, Meridien's team enrolled 9 subjects (100% of goal). The retention rate for this study was 100%.

When it comes to vaccine trials, the Florida's large and diverse population makes it an ideal location for successful recruitment. For vaccine studies, call on Meridien Research!

## About Meridien Research

Meridien Research has been offering medical research to residents of Central Florida since 2000. With six privately-owned clinical trial facilities in St. Petersburg, Tampa, Brooksville, Bradenton, Maitland and Lakeland, Meridien Research's mission is to provide consistent, high-quality clinical research in a professional, ethical and timely manner.

Meridien Research has conducted more than 2,000 clinical trials across a wide range of therapeutic areas for the pharmaceutical, biotechnology and contract research industries. Meridien Research's investigators are board certified and specialists in endocrinology, dermatology, internal medicine, cardiology, central nervous system disorders and men's and women's health. Their CTMS database includes 90,000+ diverse patients.

Meridien Research's services include conducting Phase Ib-IV, PK and specialty studies, dedicated marketing and patient recruitment, rapid feasibility response and streamlined communication with regards to contracts, budgets, regulatory and invoicing.
